Map legends historically were fixed elements on a printed map, but interactive digital maps often include dynamic map legends. What's on a map legend? a map legend shows colors, shapes and symbols to define a certain characteristic of the map. on a physical location map, you could find areas of lakes, rivers and mountain chains highlighted in the map legend for the type of map that is used. on a political map, you will find areas of influence related to an individual political or political party. a map legend will show colors and forms for political influences, such as parties, which are dominant in a particular state or region. ondo a map legend the legends of the map are often found at a top or at the bottom of a map, with a color or a symbol and a description of what theseand symbols mean. Check your map area and then consult the map key for a clearer definition of the map part you're seeing. The purpose of the map legend is also to show relationships between some things. You are sixBe in a large underground area and consult the subway map, as an alternative to take a bus or machine. The map and its legend can highlight not only the distance but also the complexity or facilitating of your trip using a public subway. This value in highlighting space relationships is a fundamental resource for a printed map legend. Types of legends maps there are many different types of maps, so the legend of the map varies according to the purpose of the map. On physical geographical maps, shapes and symbols probably show the position for city and city, rivers and lakes, government buildings, county boundaries and highways. On more specialized maps, the legend of the map differs. For example, on a map of a large building or complex, doors, windows, exits, stairs, fences, ownership boundaries, and more will be highlighted in the legend of the map. Types of maps printed since the dawn of man, mapmakers and cartographers have created maps for driving by travelers. The first maps were started to be made on clay tablets, and more late on parchment paper and finally to printed maps and atlantous books. Today, there are many types of maps and their corresponding legends. It is possible to find common folding road maps and large road maps in a delimited atlas form. If you are a meteorologist, you will consult meteorological maps and climatic maps. There are reference maps, political maps, population maps, gender maps, and more. The printed maps have lost general use in the last 20 years, due to the increase in satellite-action GPS on mobile devices. Having a direct voice in your car through your mobile device is an innovation that few of us could live without today.
