

VACUBOY

Multifunctional Hand Operator for Vacuum Systems

VACUBOY

The VACUBOY fits all...

The **VACUBOY** hand operator is designed to accommodate a variety of aspiration adapters – either stainless steel, Pasteur/serological pipettes or disposable tips. Each adapter is designed to perfectly match the physical dimensions of typical laboratory glass and plastic containers.

The **VACUBOY** is a very **convenient tool** to control aspiration and disposal of fluids from slides, cuvettes, tubes, micro plates, Petri-dishes, T-flasks, roller bottles, bioreactors and other typical containers used in laboratories.

Furthermore it fits any existing vacuum source in a laboratory, therefore it is an **ideal upgrade** to the infrastructure already in place.

Benefits

- Very easy and time saving operation
- Ergonomic design takes the strain out of tedious aspiration tasks

Customers

- Pharmaceutical / Biotech industry
- Cell culture facilities
- Laboratories working with bio-hazardous fluids
- Laboratories working with pathogenic material

Features

Single and Multi-channel aspiration adapters:

- Single channel
- 4-channel
- 8-channel

For different tips:

- Pasteur/serological pipettes
- Stainless steel
- Disposable tips

All parts in contact with fluids are autoclavable

...Applications

T-Flasks

Roller Bottles

Microplates

Erlenmeyer Flasks

6-well Plates
